INSTRUCTIONS TO KEY HOLDERS.

1. On the breaking out of a fire, notice should be immediately communicated to the nearest Alarm Box, Keys of which are always in the hands of the Police, and responsible persons in the vicinity of the Boxes.

2. Key holders, upon the discovery or positive information of a fire, will unlock the box, pull down the slide or hook once, and let go. This gives the desired alarm all over the city, repeating itself five times.

3. All persons giving fire alarms are requested to remain by the box a moment, and if no clicking is heard in the box, pull again; if you still hear no clicking, go to the next nearest box and give the alarm from that.

4. Never signal for a fire seen at a distance. Never touch the hook except to give an alarm of fire. Be sure the box is locked before leaving it. Give an alarm for no cause other than an actual fire. Do not give an alarm for a chimney.

5. Owners and occupants of buildings are requested to inform themselves of the location of the signal boxes near their property, also the places where the keys are kept. Be sure the alarm is properly given. One single stroke of the Alarm Bell and Engine House Gong is not given for an alarm of fire.

6. Alarms will be sounded on the Fire Bells thus: For box 5, five strokes, 1–1–1–1–1, with short intervals and repeating. For box 32, the strokes, 1–1–1, a pause, then two strokes 1–1, a pause, and repeating. Alarms for other numbers are given in a like manner.

7. Ten successive strokes upon the Alarm Bells will be given as a signal for calling out the whole Fire Department.

CAUTION.—Never pull the hook while the Alarm Bells or the Gong in the box are striking. J. MURRAY FAIRCHILD, Sup't.

Collegiate and Commercial Institute,

Nos. 15 and 17 WOOSTER PLACE.

The regular course in the department preparatory to Yale College, occupies three years; but full opportunity is allowed to those who can prepare more rapidly. There are special courses arranged for those who are to enter the Scientific School, and for those who are to follow business pursuits. Parents will find, in the instruction given in Military Drilling, Gymnastics, Swimming, etc., and in the ample grounds for out-door games under careful supervision, just the advantages for physical training and vigor, which boys in cities need. The Boarding Department is designed for pupils who do not reside with near relatives in New Haven, and to secure to them those family advantages and that paternal care and moral and religious discipline which their age so obviously demands.

Officers and Teachers:

William H. Russell, A.M., Principal and Instructor in Latin and Ethics.

Boynton's Improved

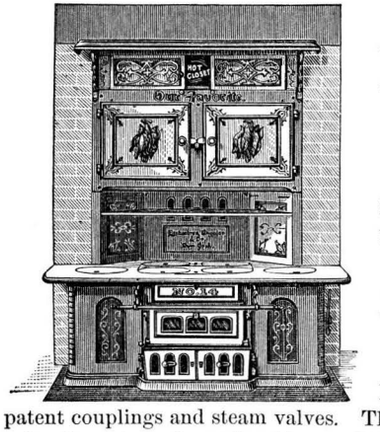

HOT AIR FURNACE.

This Furnace was first brought to the attention of the citizens of New Haven by us in 1857, and the improvements that have been made from time to time, have made it the most popular furnace, and its sale has increased from year to year; and, while many other kinds have disappeared from the market, this is the prominent furnace of the day.

Salamander Portable Furnace.

This Furnace has been tested in large numbers during the past five years, and we feel safe in stating that there has never been a more successful furnace introduced in the market. It meets the requirements of the multitude who want a furnace simple in its construction, economical in the use of coal, with few joints, powerful in heating, heavy castings, and of moderate price.

DAVID B. CROCKETT,

MANUFACTURER OF

"No. 1 and 2 Preservative,"

Or Architectural Wood Finish,

SPAR COMPOSITION, CAR AND CARRIAGE PRIMING,

Painters' Japan Dryer, etc., etc.

NO. 1 PRESERVATIVE is an article to be used in all places where you wish to keep out dampness or other foul matters that may come in contact with it, on either hard or soft woods. It is also a superior article where you wish to finish woods in their natural color; at the same time it prevents their checking or stripping up, as is the case of hard and soft wood floors. It also renders the wood work strictly impervious to staining or discoloring from any substance that may come in contact with it, as dirt stains, etc.; can be readily removed, by simply washing off. It is far superior, and costs less than shellac, and its great value to Hospitals, Asylums, Public Buildings, etc., demands the attention of Architects and Builders, particularly those in charge of Hospitals and Asylums.

NO. 2 PRESERVATIVE, OR ARCHITECTURAL FINISH, is a coating to be used over the "No. 1 Preservative," where you wish a brilliant and durable finish. It will not crack, blister, or turn white, and over grained work has no equal, and is not affected by extreme changes of temperature.

SPAR COMPOSITION is a superior article for all bright work on Vessels and Spars, it being a tough elastic coating for wood or iron exposed to the extremes of weather; is positively waterproof, and is being used extensively on Yachts, Steamers, etc.

CAR AND CARRIAGE PRIMING, OR WOOD FILLER, is the most perfect article ever used for the purpose, it having been tested by leading manufacturers, and so pronounced by them. By coating Bodies, Gearing, Wheels, Springs, or any part of the Carriage or Car with one coat of the Primer, you render the wood perfectly preserved from taking in dampness, and they can be put away until such times as you may wish to paint them.

All information as to using the above materials and price of same will be furnished by addressing
